MARKET REVIEW

Sugar sales continue to lag behind those of last year. However, the gap has narrowed somewhat in recent weeks. Reported distribution of sugar by primary distributors for consumption in the continental United States this year through April 15 amounted to 2,561,000 tons as compared with 2,632,000 tons a year ago.

In addition to being smaller than last year, sugar distribution differs somewhat as to composition. Through April 15, sugarbeet processors had distributed 631,000 tons, a quantity 120,000 tons less than in the comparable period in 1966. Cane sugar refiners, on the other hand, through the same date had distributed 1,874,000 tons or 57,000 tons more than in the corresponding period of 1966.

Inventories of refined beet sugar at the end of March totaled 1,462,000 tons or 118,000 tons less than the 1,580,000 tons of a year earlier. Production of beet sugar in February and March was below average principally because heavy rains in California delayed the start of the harvest of over-wintered beets.

Inventories of raw and refined sugar held by cane sugar refiners on March 31 totaled 827,566 tons -- almost 150,000 tons more than on March 31, 1966.

On March 16, 1967, the Department allocated 50,000 additional tons of raw sugar and on April 19 authorized a further 75,000 tons of raw sugar for importation from foreign countries during the second quarter of 1967. These two actions increased the quantity that may be imported during the second quarter to 1,225,000 tons. Imports of raw sugar during the second quarter of last year amounted to 1,025,000 short tons, raw value.

On April 5 the spot price for raw sugar at New York rose to 7.20 cents where it remained until April 18 when it rose to 7.23 and to 7.25 on April 19. The average for the year through that date was 7.18 cents.

There have been no changes this year in the wholesale price quotations for refined sugar in the basic package. By territories, as of April 18 the quotations were:

	<u>Cane</u>	<u>Beet</u>
	<u>Cents per pound in 100 lb. paper bags</u>	
Northeast	10.60	
Southeast	10.20	
Gulf	10.20	
Eastern beet		9.65
Chicago-West	9.85	9.65
Direct shipment territory	9.75	9.55
Lower Pacific Coast	9.95	9.95
Northwest Intermountain	9.85	9.85

Northeastern refiners on March 29 reduced their price of bulk granulated and liquid sugar from 10.3 cents per pound to 10.2 cents.

The 1966-67 harvest season in Florida ended March 30 with excellent results especially in the closing weeks. Florida mills ground approximately 6,419,000 tons of cane producing a record crop of 652,261 tons of sugar, raw value. The 1966 Louisiana crop of 562,000 tons was completed some time ago. This would bring the production of the mainland cane area to 1,215,000 tons, raw value.

Sugar production in Hawaii through April 8, 1967 amounted to 197,151 tons as compared to 231,882 produced through April 9, 1966. The figures for March reflect the effects of two weeks of unfavorable weather which markedly reduced harvesting operations during the period.

Sugar production in Puerto Rico through April 16 amounted to 528,985 tons compared to 541,896 tons as of the same date last year. Sugar recovery in relation to cane ground was 9.741 percent this year compared to 9.371 last year.

The Crop Reporting Board of the U. S. Department of Agriculture on March 20 indicated that farmers as of March 1 intended to plant 1,279,000 acres to sugarbeets this year -- three percent more than the 1,243,000 acres last year. Informal information since that time suggests that farmers may plant slightly more than they had planned as of March 1. F. O. Licht, the European sugar statistician on March 30, 1967 estimated that European farmers would plant 7,005,000 hectares to sugarbeets, an increase of about 2 1/2 percent over last year.

The New York Coffee and Sugar Exchange spot price for world market raw sugar after dropping to a record low for recent years of 1.23 cents per pound on January 6th and 7th averaged 1.71 cents per pound in February and 1.61 cents in March. The price during the first 11 calendar days of April remained at 1.8 cents and then rose rather steadily to 2.40 cents per pound on April 24. Futures prices for that day ranged from 2.65 cents for the July 1967 position up to 3.08 cents per pound for September 1968 delivery.

USDA Announces Additional 75,000 tons of Foreign Sugar Made Available During Second Quarter:

The U. S. Department of Agriculture announced on April 19 that the second quarter limitations on total raw sugar imports of 1,150,000 tons had been raised by 75,000 tons to a total of 1,225,000 short tons of sugar, raw value.

Trade reports indicate that recent firmness in the Caribbean and in certain South American freight markets has caused some difficulties in arranging shipping for sugar. Present indications are that receipts of domestic offshore raw sugar during the second quarter will be less than previously anticipated. Due to low beet sugar inventories, in comparison to recent years, beet sugar marketings are expected to continue to be well below those of last year until late in the year when new crop sugar becomes available. Under these circumstances, it is desirable to increase the quantity of foreign raw sugar that may be imported during the second quarter to provide adequate supplies of sugar to refiners and to maintain stable sugar prices.

Priority for approving applications as set forth in today's amendment to Sugar Regulation 811 provides that the additional 75,000 tons shall be prorated among countries for which applications are filed, on the basis of average first half importations from such countries during the four year period, 1963 through 1966. Applications for the importations of sugar or for the set aside of quota for arrival during the second quarter of 1967 received on or before May 1 will be considered as having been received at the same time.

50,000 Tons of Sugar Allocated for Second Quarter Import:

The United States Department of Agriculture on March 16, 1967 allocated 50,000 tons of sugar for importation from foreign countries during second quarter of 1967 in accordance with Sugar Regulation 811, Amendment 3, announced in USDA Press Release 713-67 of March 3, 1967. This additional 50,000 tons raises second quarter importations to a total of 1,150,000 tons. Applications were received covering sugar from sixteen countries, the allocations being made on the basis of the average first-half importations from such countries as shown in the table below.

ADMINISTRATIVE ACTIONSDate announcedNature of action

March 28,
1967

Announced the fair and reasonable wage requirements for sugarbeet work in all producing areas, effective April 17, 1967.

The determination increases the minimum time rate 5 cents per hour - from \$1.35 to \$1.40. Minimum piecework rates are increased by 50 cents per acre for most operations.

Minimum hourly wage rates of not less than 75 percent of the specified minimum rate are provided for youths 14 to 16 years of age. The prior determination permitted a reduction of one-third. Youths 14 to 16 years of age are not permitted to work more than 8 hours in any one day.

Other provisions of the determination are unchanged. (See April 1, 1967 Federal Register).

April 14,
1967

Announced revised processor allotments of the 1967 quota for the mainland cane sugar area. Today's action will enable Florida raw sugar mills to market an additional 125,000 tons of sugar from the crop completed earlier this month. (See April 20, 1967 Federal Register).

April 21,
1967

Announced that an informal public hearing will be held May 10, 1967, in Miami Beach, Fla., to receive views and recommendations with respect to establishing farm proportionate shares (acreage allotments) for the 1968 sugarcane crop in the Mainland Cane Sugar Area (Florida and Louisiana). The hearing will begin at 10 a. m. (EST) at the Casablanca Hotel. (See April 25, 1967 Federal Register).

STATISTICAL SERIES IN THIS ISSUEHIGHLIGHTS

1. March 1967 sugar deliveries for continental U. S. consumption 850,000 short tons, raw value (preliminary) up about 178,000 tons from February 1967 and up 33,000 tons from March 1966. January-March 1967 deliveries 2,181,000 short tons, raw value, down 86,000 tons from January-March 1966. Final data for February 1967 deliveries 672,000 short tons, raw value - previously published preliminary as 675,000 tons.
2. Primary distributors' stocks April 1, 1967 were 2,549,943 short tons, raw value (preliminary) up 31,000 tons from a year ago, and down 184,000 tons from February 1967. During March refiners' stocks increased 68,000 tons, beet processors' stocks decreased 207,000 tons, importers of direct consumption sugar stocks decreased 8,000 tons, and mainland cane processors' stocks decreased 36,000 tons.
3. Charges to quotas January 1 to March 31, 1967 were 3,568,874 short tons, raw value, leaving a balance of 6,831,126 tons to be supplied within the 10,400,000 ton total.
4. Regionally, January-February deliveries, 1967 as compared to 1966, were down in all of the 5 regions: decreases -- South 11.3 percent, West 10.5 percent, North Central 7.3 percent, New England 6.6 percent and Middle Atlantic 3.0 percent.
5. February 1967 distribution of corn sweeteners by corn refiners -the equivalent of 120,000 short tons, raw value, down 20,000 from January 1967 and down 5,000 tons from February 1966. Corn sirup distribution February 1967 - 81,000 tons, down 22,000 tons from January 1967 and down 6,000 tons from February 1966. Distribution of dextrose February 1967 - 39,000 tons, up 2,000 tons from January 1967 and up 1,000 tons from February 1966.

¹/ Spot prices are for bulk sugar under Contract No. 10 which, beginning November 21, 1966, replaces Contract No. 7. The terms of these contracts are duty paid or duty free, full duty rate .625 cent per pound.

²/ Spot prices are those under No.8 Contract which is for bagged sugar f.o.b. and stowed at Greater Caribbean ports (including Brazil).

³/ The No. 10 "Domestic Bulk" Contract has been adjusted by deducting duty (.625¢) computed freight from the Greater Caribbean ports (including Brazil), insurance and unloading charges and adding the bag allowance (currently .055¢) before calculating the differential from No. 8 "World" Contract spot prices.

⁴/ These are basis prices in 100-pound paper bags, NOT delivered prices. To obtain delivered prices add "Freight Prepays" and deduct discounts and allowances. For illustration see Sugar Reports 81, January 1959, pages 5 to 9.

1/ Gross basis price in 100 pound bags subject to a 2 percent cash discount.

2/ Hydrate, commercial bags less than carlots, ex whse., N.Y. 100 lbs. Beginning April 1964 price is for 600 bag carload f.o.b. N.Y.

3/ In drums, price in carload lots, except from February 1962 to April 1964 for less than carload lots. Beginning April 1964, price is for tank cars f.o.b. New York, per cwt. Quoted as 42 percent unmixed, except beginning March 1956, quoted as 43 percent unmixed.

4/ Assumes price is for 92 percent solids for dextrose and 80.3 percent solids for corn sirup. Thus dry basis price is quoted price divided by 0.92 for dextrose and 0.803 for corn sirup.

Supplement to SUGAR STATISTICS, Volume II, for Hawaii, Puerto Rico and Virgin Islands

This supplement brings to date Statistical Bulletin No. 244, "Sugar Statistics and Related Data," Volume II (revised), issued July 1963 as it relates to the domestic cane areas of Hawaii, Puerto Rico and Virgin Islands. 1/

Some readers may want to transcribe the data appearing in this supplement to the tables in that bulletin. A cross-reference of the tables in this supplement to the corresponding tables in Volume II is shown below. 1/ Supplements to Volume II for Hawaii, Puerto Rico and Virgin Islands appear in April 1964, January 1965 and April 1966 issues of SUGAR REPORTS.

Copies of Statistical Bulletin No. 244 may be obtained upon request to the Information Division, Agricultural Stabilization and Conservation Service, U. S. Department of Agriculture, Washington, D.C., 20250
